

liquid ARCHITECTURE

Liquid Architecture is a small architectural practice with over 10 years of local experience providing quality architectural design, documentation and project management services.

If you are contemplating a renovation, alterations and additions, or new home project, Liquid Architecture offers a competitive fixed fee concept design service where we produce several design options based on your brief. A thorough and concise written report accompanies the design drawings, and looks specifically at your project, including the Council requirements and project cost and time estimates.

The report information enables our clients to make a confident and well informed progression into a design and documentation process.

Please contact us for a meeting at your home if you are interested in knowing more.
